# Outline

- Introduction
- Strategy, Policy and Regulations
- Data and Infrastructure
- Skills & Talents
- Innovation Ecosystem
- Key Smart Cities AI Use Cases
- Concluding Remarks

# Introduction

**AI For  
SDGs  
Acceleration**

# Smart City Ecosystem Framework

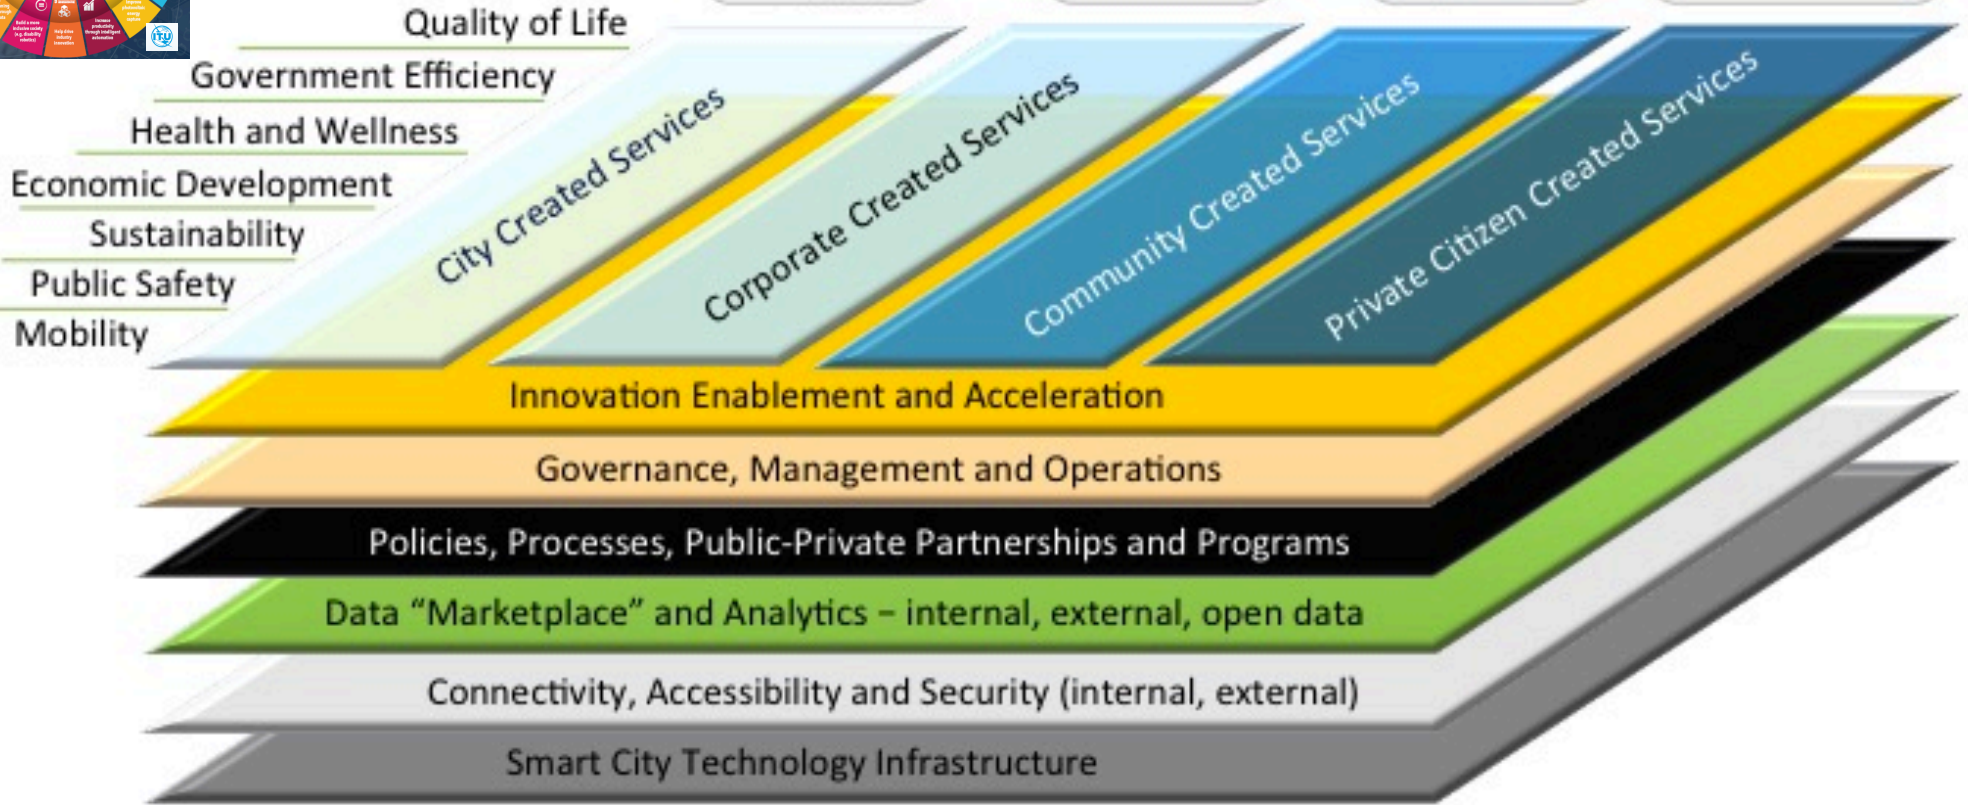

- Parking
- Lighting
- Traffic
- Waste Mgmt
- Energy Mgmt

- Ridesharing
- Commute planning
- Bike sharing

- Airports
- Districts
- Office parks
- Universities
- Apartments

- For profit microservices
- Not for profit microservices

# Main Smart Cities Challenges

- Technology challenges with coverage and capacity.
- Digital security.
- Legislation and policies.
- Lack of confidence or reluctance shown by citizens (lack of clarity around benefits).
- Funding and business models.
- Interoperability.
- Existing infrastructure for energy, water and transportation systems.

# Projected revenue generated by companies in the global smart city

# Country profile

The Kingdom of Morocco Map

- Population: 36,289,698 \*
- Urban population: 63,8 % \*
- Internet users: 27,62 M \*
- Social media users: 22 M \*
- Mobile subscribers: 117,1% \*
- GDP: 119,7 B \$ \*\*

\* HCP - High Commission for Planning of Morocco, 2020.

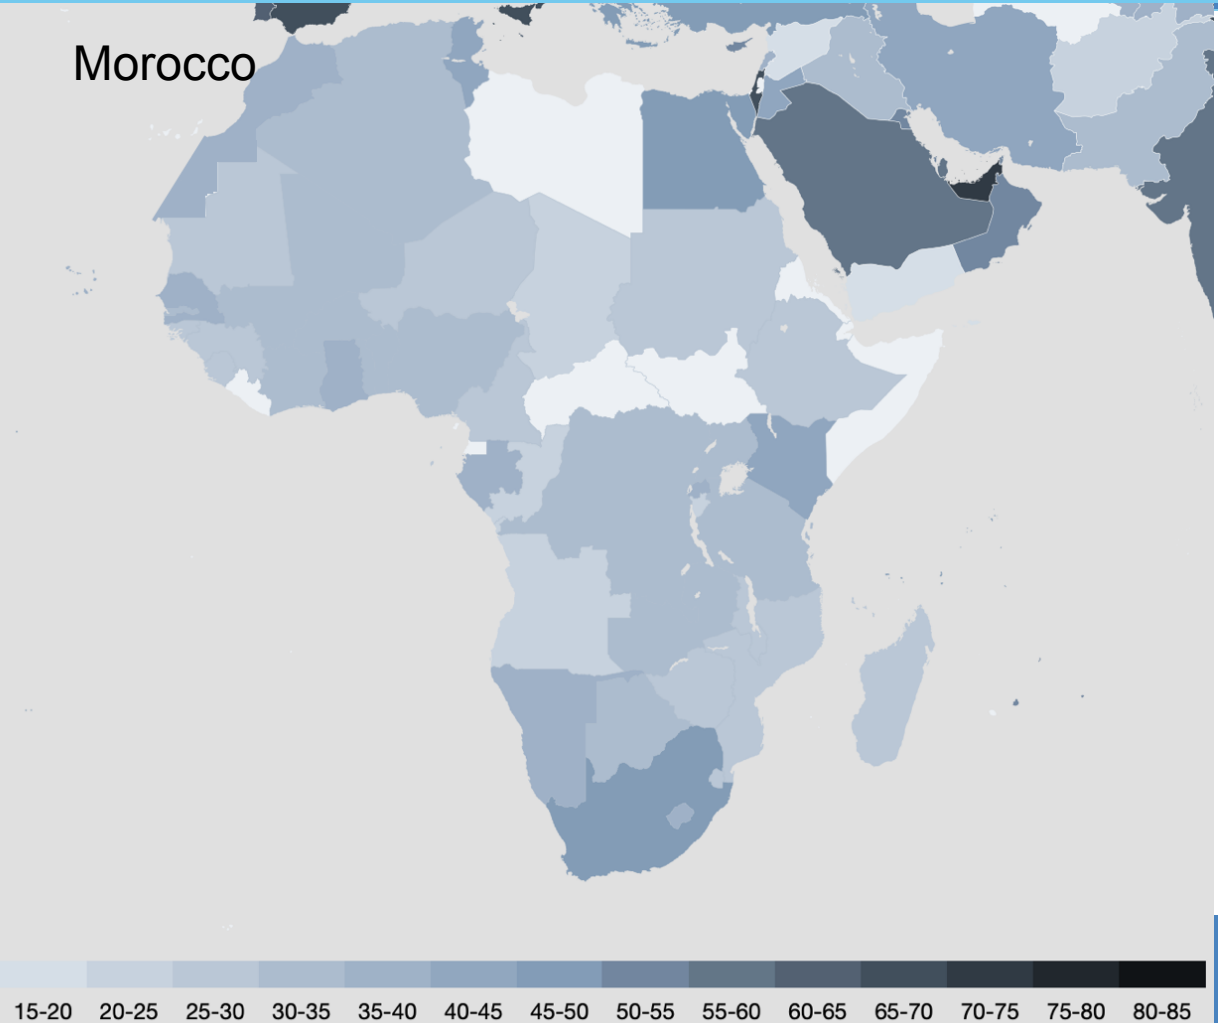

\*\* World Bank Group, 2020.

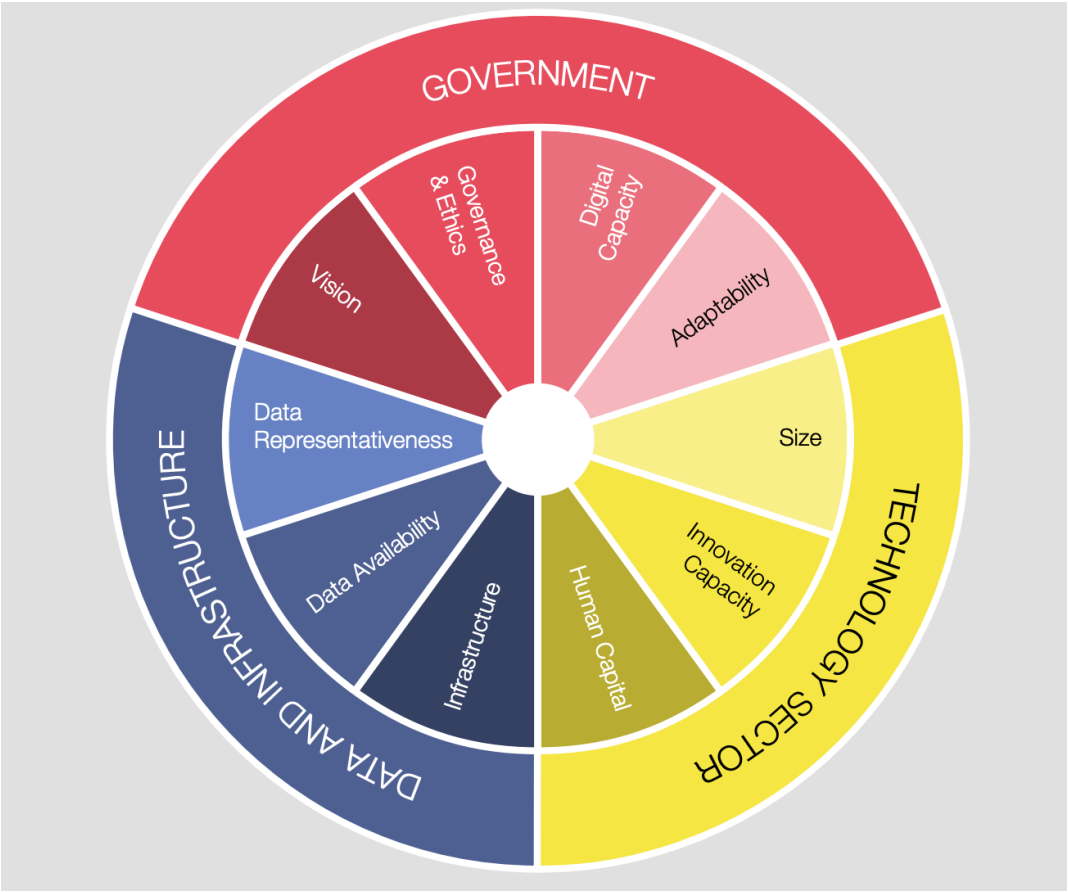

# 2020 Government AI Readiness Index in MEA

Government  
AI Readiness  
Index  
**2020**

Morocco

# Pillars & Dimensions of the Government AI Readiness Index

Source: Government Readiness AI Index, 2020.

# The Building Blocks of Government AI Readiness

1. The Government needs to be willing to adopt AI, and able to adapt and innovate to do so ;
2. It also needs a good supply of AI tools from the technology sector ;
3. These tools need to be built and trained on high quality and representative data, and need the appropriate infrastructure to be delivered to and used by citizens.

*Source: Government Readiness AI Index, 2020.*

# AI Readiness Index Indicators

Cluster	Indicator
Governance	Data protection/privacy laws - yes/no
	National AI strategy - yes/no/pending
Infrastructure and data	Data availability
	Government procurement of advanced technology
	Data/AI capability (in government)
Skills and education	Technology skills
	Private sector innovation capability
	Number of AI startups
Government and public services	Digital public services
	Effectiveness of government
	Importance of IT to government's vision of the future

Source: Government AI Readiness Index, 2020.

# Strategy, Policy & Regulations

# Strategy, Policy & Governance

- During the last few years, Morocco has adopted several policies and Strategies that support AI & digital Transformation in the country through out all sectors and enablers ;
- The “Morocco’s New Development Model”: 2035 vision for Morocco, announced two week ago, puts AI and DT as the main and key enablers for the countries’ sutainable and inclusive development ;
- Covid-19 has been an amazing accelerator of DT and AI adoption in all sectors and activities ;

# Strategy, Policy & Governance (Cont'd)

- Digital Development Agency (Governmental Agency, 2018)
- ADD Road Map (Digital & AI Strategy 2025, 2019).
- Data protection regulation: (Law 1-09-15 of February 2009)
- Data protection agency: National Commission Controlling Personal Data Protection (CNDP)
- National Telecom Regulation Agency
- National Sectoral Strategies (Agriculture, Industry, Healthcare, Administration, Education, Innovation, ...)

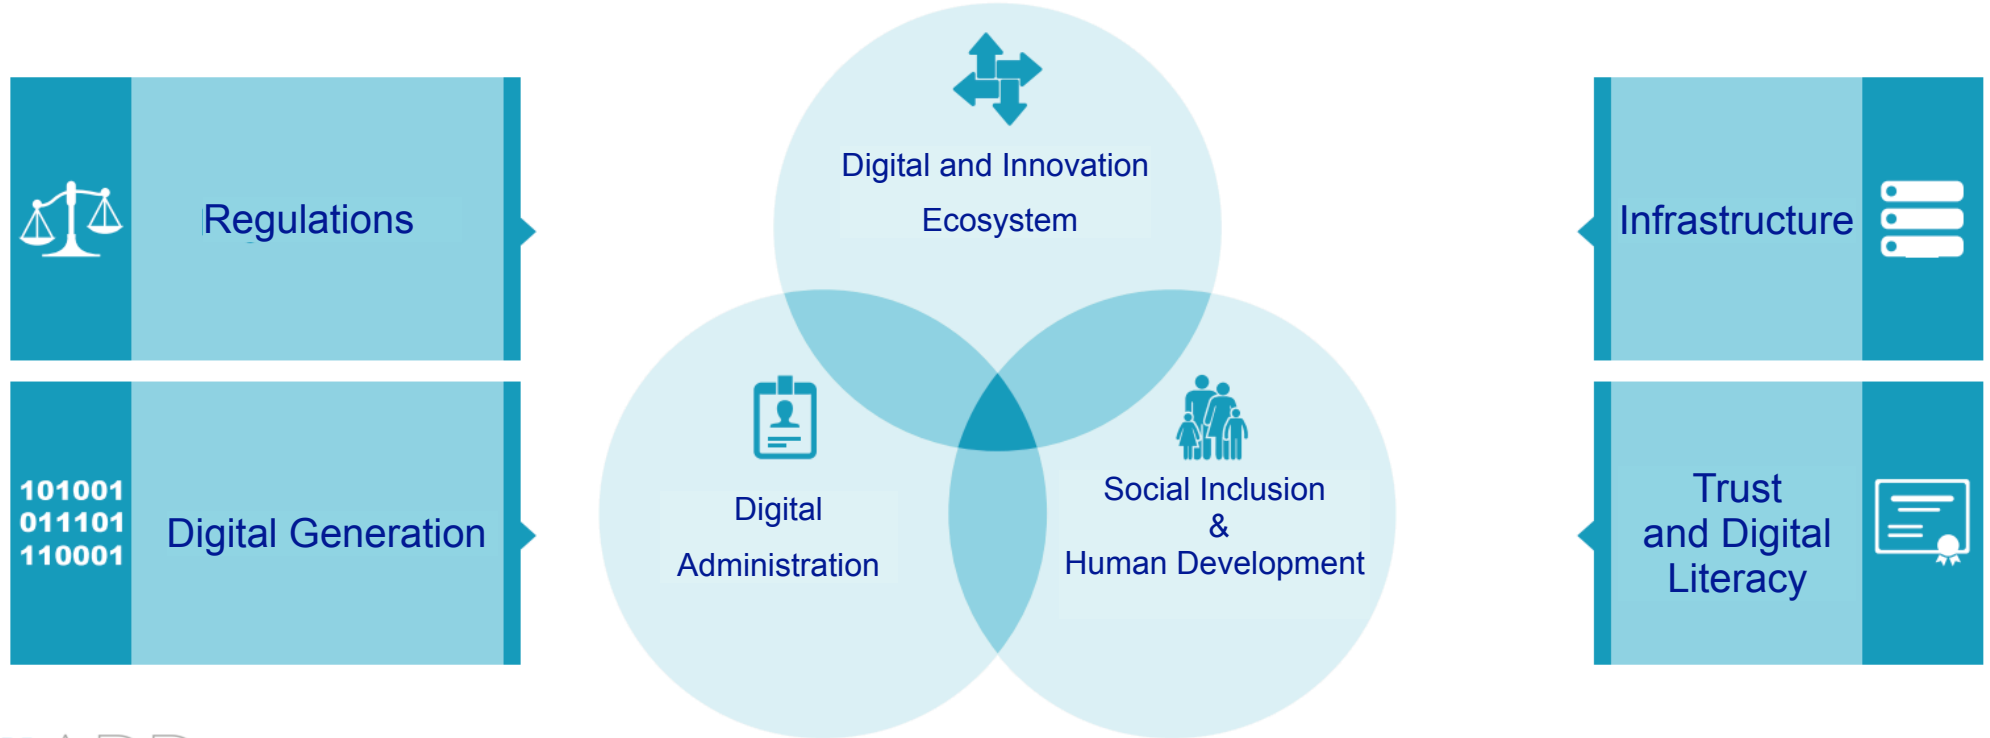

## Main strategic objectives:

- A digital administration at the service of citizens and businesses ;
- A competitive economy thanks to the performance gains brought about by AI & digital innovative ecosystem ;
- An inclusive society thanks to digital technologies.

## Artificial Intelligence School to Open in Fez

With artificial intelligence expected to generate more than 2.3 million jobs by 2020, Morocco has begun to prepare its students for the future by opening a school dedicated to AI training. @ *Euro-mediterranean University in Fez.*

Staff Writer July 12, 2019 5:20 p.m.

Source: *Morocco World News.*

- Almost all Moroccan Universities and Eng. Schools introduced AI Eng. & masters programs: ENSIAS, UM5 - Rabat, School of Computer Science, UM6P-Benguerir, etc.
- Strong partnership with leading AI companies to roll out AI training & certification (e.g. Microsoft, IBM, Dell EMC, Huawei, etc.).
- This has already started providing a very important pool of AI talents which is expected to grow in the next few years.

# MOROCCO STARTUP ECOSYSTEM MAPPING

## Tech4Commodities

Marqué par une politique économique volontaire en termes d'innovation énergétique et agricole et du fait d'un positionnement leader international, c'est sans surprise que l'on trouve des startups de qualité dans ces domaines.

## Industry 4.0

Depuis quelques années, au-delà d'entreprises pionnières, la tendance aujourd'hui est à la généralisation d'intégration de solution IoT, Big Data et de smart logistique

## L'entreprise digitale

Également victimes du Covid, les processus internes des entreprises déjà en voie de digitalisation avant le Covid voient une accélération massive de la dématérialisation qu'assurent de nombreuses Startups multi-expertises attractivity.

## XaaS

Les modèles économiques des Startups évoluent vers des tarifications de services à l'usage et trouvent écho avec des entreprises en incertitude et en recherche de variabilisation des coûts dans les modèles XaaS

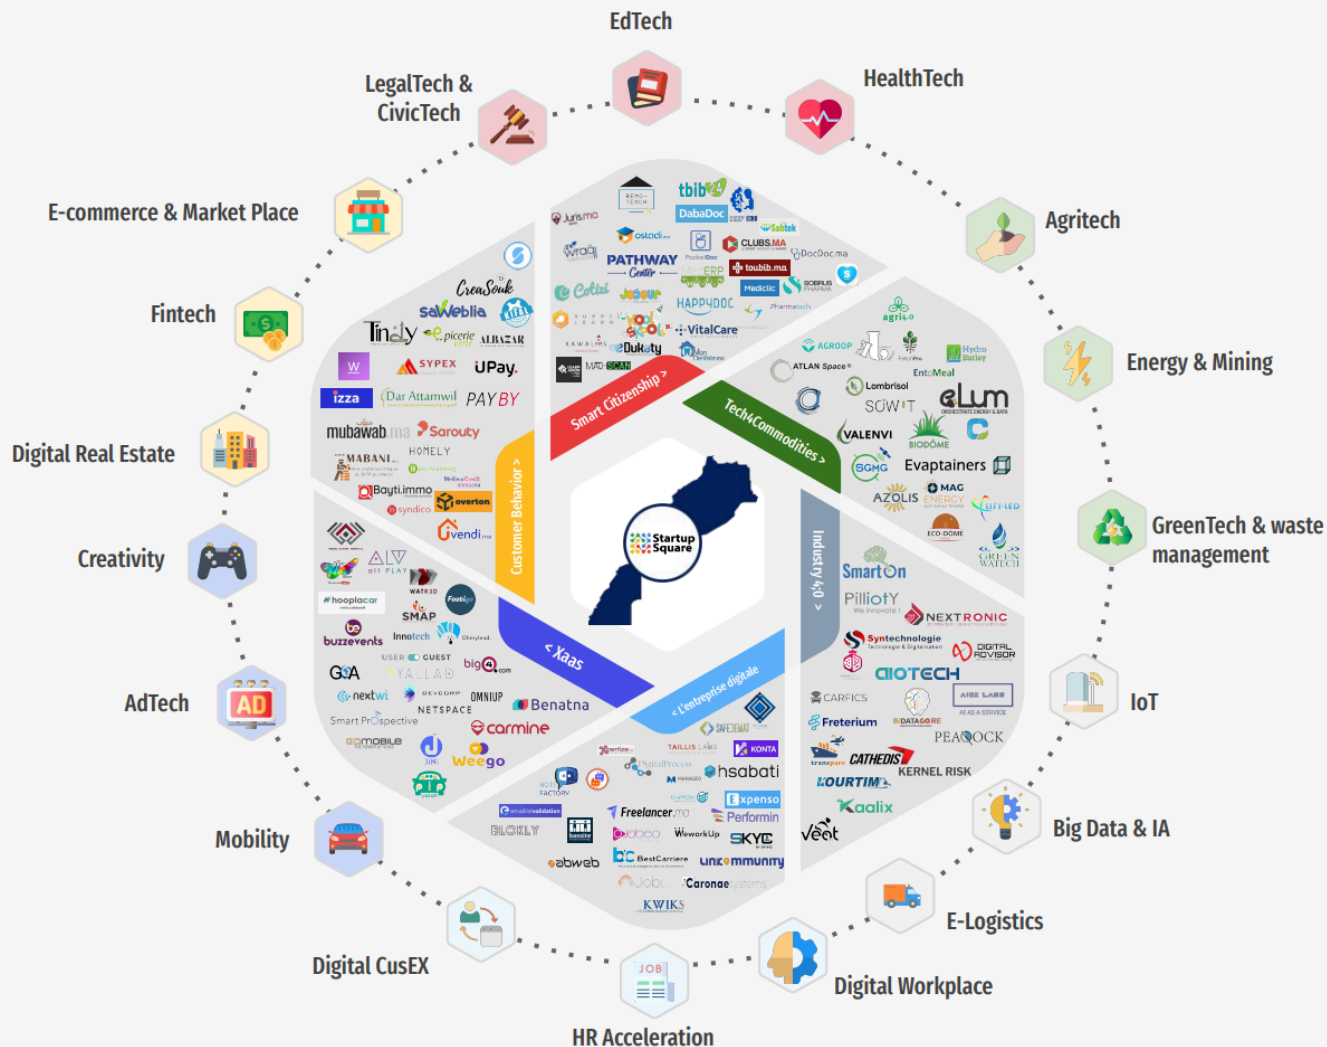

## Customer Behavior

Les usages des consommateurs évoluent au gré de l'arrivée des générations natives de l'Internet aux classes d'âges à forte intensité de consommation. Des Startups marocaines à forte croissance se positionnent pour adresser ce marché.

## Smart Citizenship

Les organisations sociales sont également à l'écoute des usages mais accusent un léger retard par rapport aux activités commerciales. Pour autant, les services de premières nécessités sont en phase d'évolution avec un sponsorship étatique générateur d'opportunités pour les startups du domaine

# The IEEE IoT Global Cities Alliance

**Chair:** Joel Myers (UK)

Global collaboration between the IEEE IoT Initiative and cities worldwide, in order to work side-by-side with city leaders and stakeholders on:

- best practices and standards: use/improved communications of existing ones + building and prioritising new ones together
- co-hosting and speakers in the IEEE IoT Smart Cities Summits and the IEEE World Forum on IoT
- publishing of smart city strategies, frameworks, use cases and results in IEEE journals, magazines and newsletters reaching our 450k membership in 160+ countries worldwide
- production and communications of the “Smart Cities Webinar Series”

IEEE IoT/SA Smart Cities Survey: being sent out to IEEE members, smart city leaders and stakeholders with **currently 83 cities** onboard from: Australia – Brazil – Canada – China – Colombia – Ecuador – Finland - Hong Kong – India – Iran - Japan – Malaysia – Mexico – Morocco – Pakistan – Portugal – Senegal – Sweden – UK - USA

## Regional chairs:

**Asia:** Nim Cheung (Hong Kong)

**Europe:** Rosaldo Rossetti (Portugal)

**India:** Sri Chandrasekaren (India)

**Latin America:** Victor Larios (Mexico)

**MEA:** Mohamed Essaaidi (Morocco)

**North America:** Fawzi Behmann (USA)

# Concluding Remarks

- Morocco's AI readiness is promising to reach a high level of maturity soon given the outstanding comprehensive ecosystem put in place recently.
- AI based Smart Cities Initiatives in Morocco are gaining momentum across different verticals and areas.
- Great Research and Innovation opportunities for Universities, companies & startups and cities' authorities.
- This will also have a very important impact on a sustainable and inclusive socioeconomic development of Morocco on the near future.

# Thank you !
