

Join us for a session on Updates to the

National Electrical Code – Solar

April 24, 2026, 7 am PDT

Live Stream Seattle Washington

Find out more about what has changed in the Solar Section 690 of the NFPA 70. How does the solar power provide AC to the facility? What types of inverters and converters are best used for commercial buildings. Find out how just little sun can still cause a fatal current. How to keep your solar panels clean, seismic mounting criteria and angle of incline are just a few of the Code issues addressed in today's presentation. Can we save you a seat? Yes.
