

**Welcome
Consultant
Network
Boston**

Aakash is a results-driven and accomplished multilingual software developer with expertise in machine learning and artificial intelligence and a demonstrated ability to develop applications that meet and exceed demanding corporate and client requirements. He is a natural critical thinker who can apply analytical skills to solve challenging problems using a combination of industry standards and cutting-edge technologies, delivering clean, well-structured code. Strong leadership skills with experience working in a team environment, as well as being a course instructor and teaching assistant, and being able to collaborate with individuals from diverse backgrounds. Exceptional academic qualifications include a Master of Science degree in Computer Science at DigiPen Institute of Technology and a patent as co-inventor for an ML-based prognostics surveillance automated pipeline.

Aakash is pursuing his Ph.D. in information technology with an emphasis on the application of AI in the US Healthcare domain and working as a software developer for an AI and data organization within Oracle Cloud in Seattle. He likes to share his knowledge on the subject of AI and Machine Learning through his blog, www.passionatestar.com, and has published his book titled "Humans and AI Coexistence: Technology Changing the World Order" which is available on Amazon and Audible. You can connect with him on LinkedIn (<https://www.linkedin.com/in/aakashchotrani>)
