

## IEEE CN Smart Cities Living Labs

May 4, 2023, 4 pm PDT

*Live Stream from Seattle Washington*

**Karim Dasuki**

This conference will explore the concept of Living Labs and their role in enhancing tech-based entrepreneurship in Smart Cities. Attendees will learn about the importance of Living Labs as testbeds for innovation and co-creation in urban environments, and how they can support the development of new technologies and solutions for smart and sustainable cities. The presentation will also highlight the key benefits of Living Labs for tech-based entrepreneurs, including access to real-world data and user feedback.

Electronic engineer and Master in Smart Cities from the Isabel I University of Spain, PMP, Scrum and Smart City International Certification. Senior consultant for projects in the public and private sectors in smart cities, technological development and implementation of public innovation programs in the USA, LATAM and Spain. Vice President of the IEEE Colombian Caribbean Section and Manager of the Innovation and Digital Transformation Cluster in Colombia.
