

Join us for a session on

Drones Safety and Inspection Microgrids

November 12, 2025, 7 am PST

Live Stream Seattle Washington

Find out how you can utilize Drones for your projects. Drones have been a cost savings on projects from inspection, heat detection, early fire notification, site evaluation, and long-term monitoring.

Our presentation today will be on Drones for public safety, thermal detection, and visual inspection. Our speaker today will highlight drones for first responders, grid and general inspections. He will highlight drones that have a specific function of delivering payloads. Don't miss! Register today at microgridConsortium.com

Christopher Lambrecht

Christopher Lambrecht, with a background in high resolution designs in the military and aerospace industry will talk on drone safety and inspections as it relates to microgrids. Chris is a consultant at Kapta Space and has several years' experience with the BRINC drones while at Echodyne.
