

12:21:01 From John Gentile to Everyone:  
Thank you! That is the best explanation of BC I've heard...

12:38:21 From Mike Brisbois to Everyone:  
Is demand charges in California working? Demand going down?

12:39:06 From Mike Brisbois to Everyone:  
Why does bitcoin take a lot of energy and the others don't in making the crypto currency?

12:40:10 From Mike Brisbois to Everyone:  
To achieve the 21%, 45%, 67% increase demand in power => transactive power will solve?

12:41:14 From Dennis Garrett to Everyone:  
That's because to verify transactions, Bitcoin requires computers to solve ever more complex math problems. This proof of work consensus mechanism is drastically more energy intensive than verifying transactions on centralized networks.

12:45:35 From John Gentile to Mike Brisbois(Direct Message):  
☺ comes down to consensus method...proof of stake for example less then proof of work ...as Dennis mentioned

12:48:07 From Mike Brisbois to John Gentile(Direct Message):  
Is PG&E and SCE presently using blockchain transactive?

12:49:45 From John Gentile to Mike Brisbois(Direct Message):  
I don't think so...but this is fantastic presentation and I'll be looking into it...oh...here we go

13:09:08 From Phil Huerter to Everyone:  
So, we need to focus on TX as they froze over last February and need Digital micro grid resilience, that FEMA and the Fed should bolster the Private Power Companies

13:09:15 From Phil Huerter to Everyone:  
Have you looked at Texas, and what will it take to bring in big Players like Duke Energy to help the US upgrade P2P policy?

13:09:24 From Phil Huerter to Everyone:  
Peer2 Market sounds like what the Tesla Power Wall software upgrade is already doing... shall we get the Raspberry Pie groups jump in to help community micro grids with this capability?

13:09:39 From James Kempf to Everyone:  
<https://attend.ieee.org/bcte/>

13:14:23 From Phil Huerter to Everyone:  
Again, we need to get \$\$ out of politics.. with Democracy Dollar

13:14:53 From Phil Huerter to Everyone:  
\*\*\*Yes, getting off Methane. We need to integrate Green Hydrogen

13:16:17 From Dominick Giuffrida Green Line Opportunities to Everyone:  
How about Connecticut , New York , Pennsylvania and doing a local build out as a pilot city!

13:16:30 From James Kempf to Everyone:
