

# **Mechanical Innovations Session**

## **October 28, 2025, 7 am PDT**

### ***Live Stream Seattle Washington***

Join us for a half-day session on Mechanical Innovations. Find out how AI is transforming this industry and cutting product production life cycles in half. Bigger, stronger and higher quality products including HVAC, building control systems, plumbing, sewage, water and process chemicals are trending. Meet up with industrial experts in your field including mechanical engineers, software developers, plumbers, and financial experts. Can we save you a seat?
