

Wireless Power

August 28, 2026, 7 am PDT

Live Stream Seattle Washington

Join us for a session on wireless power. Creation of mega cities overnight in rural desert land beamed from space satellites to commercial industrial installations where thousands of feet of copper cable would be eliminated. Stay part of our new and innovative technologies saving our clients hundreds. Imagine saving your client hundreds of thousands of dollars from not installing copper wiring at your new industrial or commercial facility. No more long costly transmission lines to install. Inside smart buildings a wireless power hub feeding all the lights and chillers in the building. Stay ahead of the industry finding out about the newest technologies. Can we save you a seat? Yes
