

# Microgrid Informational Meeting

Thursday March 11, 2021 at High Noon 12 pm PST

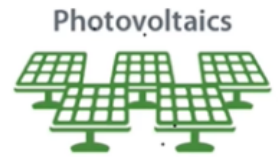

Join us for a live Stream event  
from [Seattle Washington](#)

## We will discuss:

- Power Purchase Agreements: How to obtain? Who can qualify? What is the Utility requirement to sell back power to the Grid? How to read Utility Tariff agreements?
- What am I paying for kWhrs \$ and what will the Utility pay me \$ to provide power back to the Grid?
- We will share updates on our Clean Energy Initiative where President Biden is expected to release shortly. Why is it important to get your applications in soon. Once the pot of money runs out there is no more. It is critical that we are proactive.
- Find out how you may add DERs (distributed energy resources) 5 to 10 years from now to make your facility 100% carbon neutral. We will share a real-life example of a facility in Issaquah that is total 100% carbon neutral. Using the power of the sun they can sustain 100% of their needs internally. We will showcase the first McDonalds that is 100% carbon neutral. How are they doing it? Why should you act now? Find out why the USA is so far behind in Clean Energy
- We will have a demonstration from our team on CHP (Combined Heat and Power)
- Battery types that can be used in the BESS (Battery Energy Storage Systems)
- Biomass Facilities – What are they and how can I use them?
- How to use Energy as a Service to your benefit. What does it take to qualify?
- Why are local policies important? What are some local incentives to reduce total Capital Expenses, startup costs and operation costs? What type of wind turbines are available?

Grid

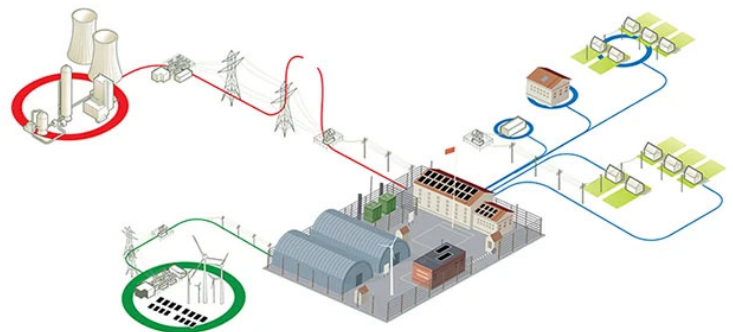

Photovoltaics

Battery

## Team Partners:

Mike Brisbois, PE, Program Manager  
Matt Mandry, Design Team A/E Mechanical  
Mark Andre, Design Team Electrical, Plumbing  
Musaad Alolayan, Electrical Contractor  
Bob Williams, Integrator Equipment Manufacturer  
Greg Nixon, Land Surveyor  
Bryan Santarelli, Esq. Attorney  
Bob Ke, Consultant Supplier  
Micah Haman, Utility  
Tom Schellinger, Professional Estimator  
Marley Smith, Nuclear  
Dave Muller, CHP specialist

Bruce Yee, Power Generation Prime  
William Bubernicek, 3<sup>rd</sup> Party financing  
Phillip Serna, Electrical Testing  
Bill Brunner, Commissioning

**Live Stream** informational meeting on clean, sustainable, resilient Energy for your facility. Sign up today at:
