

DATA CENTERS coming to MONTANA

Join us for a session on

Data Centers

Microgrid Powered

June 9, 2026, 9 am PDT

Live Stream Seattle Washington

Find out the latest technology on these power-hungry facilities that are powered totally by large microgrids off the GRID. Hydro, thermal, solar, induction, wind, hydrogen, and natural gas fueled facilities achieving five 9s. Find out how you can be part of this industrial trend. Whether you and your organization are a designer, supplier, tester, contractor, constructor, manufacturer, and/or financier we may have a place for you to help with this movement.

Can we save you a seat? Yes!
