

Microgrid Showcase

July 28, 2026, 7 am PDT

Join us for a session on the newest, most efficient, cost-effective distributed energy resource for 2026. Find out the trends in the market. Can you help us build, design, maintain and finance these money generators? Clean, reliable microgrids are the new and innovative technologies that power our data centers, schools, and factories. Can we save you a seat? Yes

Nicole Geneau

Ms Geneau is a seasoned executive in energy and infrastructure with over two decades of experience shaping new, impactful business development strategies including launching new business units, creating public-private partnerships, leading bold commercial strategies, and executing first-of-a-kind projects across North America. Proven success in pioneering first-of-a-kind clean energy deployments, scaling new business delivery models, and aligning stakeholders—from kitchen table to boardroom—across the US and Canada. Strategic convener, dealmaker, and operator with a rare confluence of experience in the language of project finance, innovation and engineering teams, and community engagement.
